MFS400

Rolled Print Fingerprint Biometrics Live Scanner

MFS-400 is a live fingerprint sensor for police or government application where high quality scanning is required. It comes with USB interface. It can read plane static fingerprints and can also be applied in 3-D print-pressed rolling scan. Sensor provide very clear image and prevent dry fingerprint problems. A variety of fingerprint identification software is added into the sensor to identify fingerprint. Fingerprint captured with this scanner can have highest identification and matching ratio.

MFS400

Features

- ◆ Police and Government applications
- ◆ 500 DPI image approved by NIST and FBI.
- ◆ Ability to identify pores with suitable application.
- ◆ Rugged and durable device, can be used for police or government
- ◆ Optional Fingerprint verification for absolute security
- ◆ Bigger platen area to capture rolled and plane fingerprint together.

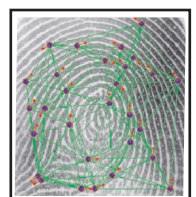

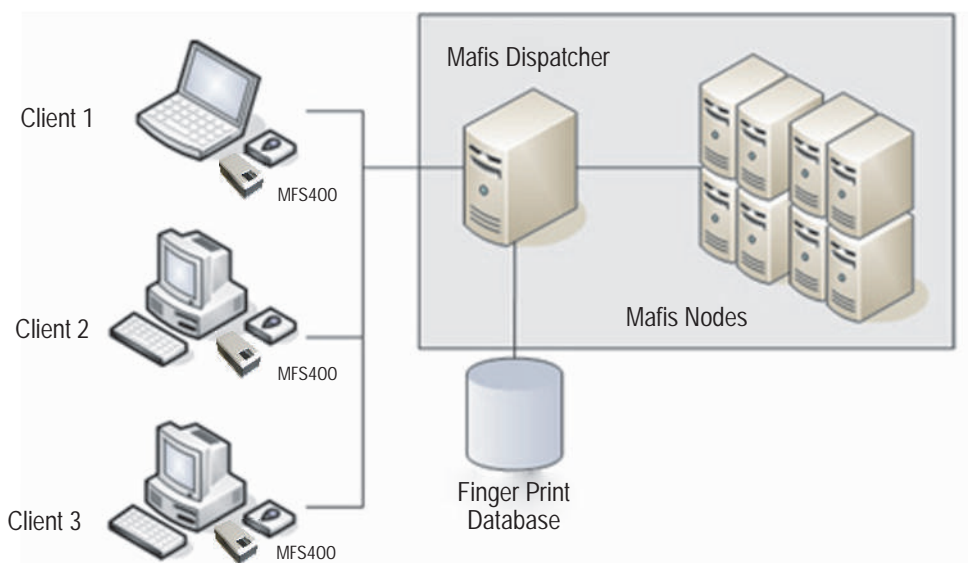

Highlights

- ◆ 39 x 36 sq mm
- ◆ 500 DPI
- ◆ Roll Capture/
- ◆ Plane Capture

Specifications

- ◆ Effective Window Area: 39 x 36 sq mm
- ◆ Interface : USB 2.0
- ◆ Resolution: 700 x 500 DPI
- ◆ OS Supported: Red Hat Linux, WinXP, Win2000
- ◆ Capture method: Hold Still Capture/Rolling Capture
- ◆ Image ratio of length to width: 1:0.707
- ◆ Power: DC 5V
- ◆ Temperature range: 0-55 Deg C
- ◆ Humidity Range: 20-80 Deg C
- ◆ Dimension: 170 x 85 x 76 mm
- ◆ Weight: 1.69 kg
