

FingerDisk

❖ **Description**

The FingerDisk is Biometric Access Controlled USB Flash Drive, which gives fingerprint access control to the content of the USB key for secure storage of your data and applications.

Lightweight and compact, the FingerDisk is incredibly small and can fit right into your pocket. It doesn't require any cable, power supply, or battery.

The FingerDisk acts as a removable hard drive when plugged into a USB port. It is truly plug-and-play on Operating Systems that support USB 1.1 or USB 2.0, like Windows ME, 2000, and XP.

Windows 98 requires a driver to be installed before the FingerDisk can be used normally.

By default the drive is locked. To Identify the Finger, A dialog pops up and asks for the fingerprint. When recognizing the print all files show up in the file explorer dialog. All in all very easy to use.

❖ **Applications**

Protect the data in your flash disk with your fingerprint

If you are worried that the data in your flash disk may get stolen, fear no more. This fingerprint biometric flash disk solution prevents unauthorized users from accessing your data. There is a write protection switch to prevent overwriting of data or virus infections. Additional features include anti-shock protection, moisture proof and magnetic proof.

The device driver is included in USB flash disk, and it supports file and folder encryption which enables your valuable data to be protected via secure access, ensuring that your personal data is kept confidential at all times. The sleek and portable design fits comfortably in your pocket. This is available in capacities of 64MB, 128 MB, 256 MB, 512 MB.

❖ Specifications

Interface	: USB 1.1
Weight	: 15g
Verification Speed	: Less than 1 sec
Scanning Speed	: Less than 1 sec.
Minutia Size	: Less than 512 bytes
False Acceptance Rate (FAR)	: Less than 0.001%
False Rejection Rate (FRR)	: Less than 0.1%
Resolution	: 500 dpi
Voltage	: 5V DC via USB port
Operating Environment Temperature	: 0 50 degrees

❖ System Requirements

- ▶ Windows 2000/XP/ME/98SE
- ▶ 400 MHz (or higher) Pentium processor
- ▶ 64 MB RAM (minimum)
- ▶ 10 MB hard drive space
- ▶ USB slot 1.1
- ▶ CD-ROM drive
